

## Office | Directives Enforcement

**From:** Trident Security Services

### Synopsis

On the night of December 29, 2014 a female employee came back to the office at 23:47:27. It was assessed that the female was the employee as she had alarm codes and knew the office well. The reason for the report is that the male who followed the female into the building did not appear to be an employee. Per Client directives Trident TSOC wanted to bring this to your attention as family/friends/spouses are not permitted on the property.
